

Team project deliverable :

Game Design Document (5%)

Your document must include the top levels of the outline explicitly. You should use your judgment as to how to present the additional detail, particularly when it is not relevant to your game.

You should write down in full paragraphs the definition of each of the outlined sections. The game design document should follow what you defined in your project proposal.

Each section should be about a paragraph.

This document needs to have 7-8 pages roughly a page per section not including the title page.

Your game design document should have all of these sections :

1. Title Page

- 1.1. Game Name
- 1.2. Tag line
- 1.3. Team
- 1.4. Date of last update

2. Game Overview

- 2.1. Game Concept
- 2.2. Target Audience
- 2.3. Genre(s)

3. Gameplay and Mechanics

3.1 Gameplay

- 3.1.1. Game Progression
- 3.1.2 Mission/Challenge/Puzzle Structure
- 3.1.4 Objectives – What are the objectives of the game?
- 3.1.5 Play Flow – How does the game flow for the game player

3.2 Mechanics (Key Section)

- 3.2.1. Rules – What are the rules to the game, both implicit and explicit.
- 3.2.2. Physics – How does the physical universe work?
- 3.2.3. Character movement in the game
- 3.2.5. Actions, including whatever switches and buttons are used, interacting with objects, and what means of communication are used

3.2.6. Combat – If there is combat or even conflict, how is this specifically modeled? If you don't have combat you can omit that.

4. Story, Setting and Character

4.2 Characters.

- 4.3.1. For each character
 - 4.3.1.1. Short Back story
 - 4.3.1.2. Personality
 - 4.3.1.3. Appearance
 - 4.3.1.4. Abilities
 - 4.3.1.5. Relationship to other characters

5. Levels

Describe each of your 3 levels

- 5.2. For your training level
 - 5.2.1. Synopsis
 - 5.2.2. Objectives
 - 5.2.3. Details of what happens in the level
 - 5.2.4.1. Map
 - 5.2.4.2. Critical path that the player needs to take finish the level
 - 5.2.4.3. Important and incidental encounters

6. Interface

- 6.1. Visual System
 - 6.1.1. HUD
 - 6.1.2. Menus
- 6.2. Control System – How does the game player control the game? What are the specific commands?
- 6.3. Audio, music, sound effects

7. Artificial Intelligence

Describe how your AI will work what kind of AI it is.

- 7.1. Opponent and Enemy AI
- 7.2. Non-combat and Friendly Characters

8. Game Art –

- 8.1. Look and Feel – What is the basic look and feel of the game? What is the visual style with reference picture ?

Note : You can use the same art and content you have use for your one page game design document for this document.

Grading grid : 5% of semester

Game Overview	Contains all of the information needed to describe an overview of the game	10 pts
Gameplay and Mechanics	Has a detail description of the interaction and core gameplay mechanics	15 pts
Characters.	Describe your characters in details	10 pts
Levels	Conveys a detailed progression, level and world building suitable for writers and level designers	15 pts
Interface	Detailed description of the interfaces and HUD element as well as some mockup to illustrate the UI design.	10pts
Artificial Intelligence	Describe the various AI archetype used in your project. As well as there purpose.	10pts
Game Art	Provide art reference for your project.	10 pts
Total		/ 100pts

Expanded Grading Criteria

1. Game Overview (10 pts)

What We're Looking For:

- **Clarity of Concept:** The document should present the core idea of the game in a clear, concise manner. This includes a well-defined vision of gameplay style, genre, and any unique or standout features.
- **Target Audience:** Clearly identifying and justifying who the game is for (e.g., casual players, hardcore enthusiasts, puzzle lovers).
- **Look and Feel:** Demonstrating an understanding of the desired aesthetic tone, atmosphere, and emotional impact.
- **Game Flow Summary:** How the player navigates through menus, levels, or story points should be logically detailed.

2. Gameplay and Mechanics (15 pts)

What We're Looking For:

- **Core Gameplay Loop:** Define how players spend the majority of their time in the game (e.g., combat, puzzle-solving, exploration).
- **Progression & Structure:** Demonstrate how missions, challenges, or puzzles unfold to keep players engaged over time.
- **Rules & Physics:** Include all explicit rules (e.g., health, lives, resource constraints) and any implicit system behaviors (e.g., NPC reactions).
- **Interaction Model:** Show how players interact with objects, use abilities, or engage in combat.

3. Characters (10 pts)

What We're Looking For:

- **Depth of Character Profiles:** Each major character should have a backstory, personality traits, appearances, and abilities.
- **Relevance to the Story:** Show how the character fits into the overall narrative and their relationships with others.
- **Variety & Uniqueness:** Characters should feel distinct and serve different roles (e.g., protagonist, antagonist, sidekick, etc.).

4. Levels (15 pts)

What We're Looking For:

- **Level Progression:** How the game's difficulty or narrative escalates from one level to the next.
- **Training Level:** A well-thought-out tutorial or introductory level that onboards the player to core mechanics.
- **Detailed Structure:** Clearly outline objectives, critical paths, and key encounters in each level.
- **Visual and Spatial Design:** Include maps or conceptual sketches, and describe how areas interconnect.

5. Interface (10 pts)

What We're Looking For:

- **HUD (Heads-Up Display):** A logical layout of health bars, resources, mini-maps, or other relevant on-screen indicators.
- **Menus & Navigation:** Clear and intuitive menu structures, including pause screens, inventories, and option panels.
- **Control Scheme:** Explanation of how players interact with the game (mouse, keyboard, controller, touchscreen, etc.).
- **Help System:** Indication of how players can learn or revisit mechanics and instructions.

6. Artificial Intelligence (10 pts)

What We're Looking For:

- **AI Complexity:** Identify what type of AI behaviors exist (patrolling guards, chasing enemies, friendly NPCs, etc.).
- **Adaptation & Difficulty:** Indicate how AI responds to player actions or difficulty levels.
- **Non-Combat Behavior:** Outline any cooperative or neutral behaviors (e.g., shopkeepers, quest givers, or puzzle-solving companions).

7. Game Art (10 pts)

What We're Looking For:

- **Visual Style & References:** Clarity on the art direction—whether stylized, realistic, pixel art, etc.
- **Consistency & Theme:** Demonstrate how all visual elements maintain a cohesive look.
- **Inspirational References:** Show mood boards, concept art, or examples that capture the game's intended aesthetic.
